

Dear FCC,

4/4/2013

I am strongly opposed to the proposed changes to allow even more violence, nudity, and foul language on the nation's airwaves. We in America were granted free speech in order to facilitate a free exchange of ideas and to be assured there would not be repercussions for criticizing the government and members thereof. If individuals choose to fill their minds with violence, nudity, and foul language there are options at their disposal, with no need to involve we in society that do not choose to have these things put into our minds.

Sincerely,
Jacquelyn Schwegel
